DETAILED ACTION

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 5/21/08 has been entered.

Information Disclosure Statement

The information disclosure statement filed 7/7/08 fails to comply with 37 CFR 1.98(a)(1), which requires the following: (1) a list of all patents, publications, applications, or other information submitted for consideration by the Office; (2) U.S. patents and U.S. patent application publications listed in a section separately from citations of other documents; (3) the application number of the application in which the information disclosure statement is being submitted on each page of the list; (4) a column that provides a blank space next to each document to be considered, for the examiner's initials; and (5) a heading that clearly indicates that the list is an information disclosure statement. The information disclosure statement has been placed in the application file, but the information referred to therein has not been considered.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 80 is rejected under 35 U.S.C. 102(b) as being anticipated by Holland (US Pat. # 4,458,701).

Holland discloses a mascara applicator (fig. 1) comprising a container (11) for containing a reserve of product, an applicator (15) capable of being arranged in the container, the applicator having an element (21) for grasping equipped with a comb including an arrangement of teeth (19, 18), the arrangement of teeth being obtained by at least two distinct parts (17, 19) that are different in shape (17 convex, 16 concave) from each other such that the parts are not mirrors images of each other and when after assembling, the at least two parts comprising a first part (22 is part of 16) with teeth (18) inclined in a first direction (Applicant is noted that the claim is interpreted as only part 22 is inclined) and a second part (23 is part of 17) with teeth inclined in a second direction different from the first direction, and the two parts being joined together pivotably by a film hinge (at 21).

Claims 24, 25, 28, 32, 34, 36-60, 70-79 are allowable over prior art of record.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hirzel, Wagner are cited to show the state of the art with respect to a mascara applicator with a film hinge.
